EDUCATION

Vellore Institute of Technology – AP University

Bachelor of Technology in Computer Science

CGPA-8.3

September 2022 – Present

Siddharth International School

Secondary and Higher Secondary Education

Percentage: 82

EXPERIENCE

President

Haryana Association

July 2024 – Present

VIT-AP University

- Successfully organized and executed over 5 major events, significantly increasing community engagement and participation.
- Led initiatives that attracted large audiences, enhancing the visibility and reputation of the Haryana Association.
- Demonstrated strong leadership and event management skills, resulting in high attendee satisfaction and positive feedback.

Software Engineer Intern

Barista Coffee Company Limited

Jun 2024 - Jul 2024

Gurugram, Haryana, India

- Gained hands-on experience in coding, debugging, enhancing technical proficiency.
- Collaborated with cross-functional teams to design, test, and deploy new features.
- Developed and implemented software solutions to improve operational efficiency, contributing to enhanced workflow automation.

Technical Team Member

Microsoft Student Chapter

Jan 2024 - Present

VIT-AP University

- Created and posted over 10+ tech content pieces, engaging with 300+ users.
- Created content creation to explain important and trending coding concepts
- Coordinate with team members to ensure timely and impactful content deliver

PROJECTS

Barista Visitor Form | HTML, CSS, JavaScript, PHP

[Link]

- Developed a responsive visitor form website for Barista, capturing user information and generating identity cards, utilizing HTML, CSS, and JavaScript for a seamless user experience.
- Implemented robust backend processing and data management using PHP, and ensured optimal performance with TanStack/React-Query for efficient data fetching.
- Deployed both frontend and backend on Vercel for seamless CI/CD integration, with strong focus on data validation and security measures to protect user information.

EDUTOR TECHNOLOGIES | HTML, CSS, JavaScript, PHP

[Link]

- Developed a visitor form website for a barista that captures user information and generates identity cards.
- Utilized modern web technologies including HTML, CSS, and JavaScript to create a responsive and intuitive interface, enhancing user engagement and accessibility.
- Implemented secure payment gateways and robust backend functionality to manage course listings, user authentication, and data security, ensuring a reliable and trustworthy platform for online education.

Mental Health Web Application | Vite, React, Tailwind CSS, Supabase, Ant Design

[Link]

- Developed a comprehensive mental health support platform featuring user profiles and a rich repository of mental health resources, using React for a dynamic and component-based architecture.
- Leveraged Vite for rapid development, Tailwind CSS for modern styling, and Ant Design for polished UI components, ensuring an intuitive and visually appealing user experience.
- Implemented Supabase for seamless authentication and robust database management, while ensuring responsive design for optimal accessibility across all devices.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS

Frameworks: ExpressJS, ReactJS, NodeJS

Tools: Git, GitHub

Concepts: DSA, OOPs, CN, DBMS
